Internal Floorplan Area	59m <sup>2</sup>	

### Multipurpose Space - Adaptable Over Time

The sky is the limit with this 59m<sup>2</sup> second storey house extension. You could move a whole other family in with the space adding a large master bedroom with multipurpose study space, another large bedroom, a bathroom that fits a bath, a sitting area plus a wet bar perfect for prepping snacks upstairs.

Extending your home in this way provides the additional space you need, without the hassle of selling and moving. Our Home Extension options provide Cubitt's customers with complete flexibility and the ability to customise floor plans and façades to create the house extension of your dreams.

NB: Plans are not to scale. Use this plan for inspiration. A home extension design will be completely personalised to your home and requirements.
